

SERENITY 86

Serenity 86 is an avant-garde luxury gulet which was launched in April 2007 and has been developed to provide the ultimate comfort and safety for it's guests. Designed and built to the latest Lloyd's classifications for design, construction & onboard systems, it ensures maximum safety for all onboard.

Serenity 86 has been created to blend the traditional beauty of a Turkish gulet with contemporary design for a bright and airy interior that holds a distinctly luxurious atmosphere. Leather stools, fine Italian accessories, LCD screens, chrome frames and opulent glass allow plenty of light inside and add to the modern feeling. She is unique in her beautiful and spacious design. Setting the standard for luxury gulet sailing, she meets every demand for comfort, class, and service.
